- E 43mm
- 1 Capping
- 2 Subsill tray

## Description

Brass window profiles represent the epitome of elegance and durability, seamlessly blending opulence with resilience. These profiles are an exquisite choice for architectural projects that demand both a luxurious aesthetic and the ability to withstand the harshest of weather conditions. Crafted from the timeless beauty of brass, these window profiles offer a prestigious and regal appearance while serving as a formidable barrier against nature's elements. These Profiles are designed to accommodate both the single glazing and double glazing options.
