MINIMAL WINDOWS & DOORS 01

Invisible Frame is an advanced sliding door system that delivers a wide spectacle of uninterrupted glass. The casement is engineered to disappear behind construction elements like floors, walls or ceilings. Glass seemingly floats in the air, seamlessly connected using frames as slim as 20 mm to create a continuous, unbroken and expansive vista.

BIFOLD

Here are some of our most popular window and door configurations. However, the possibilities for window and door setups are truly limitless due to our comprehensive custom services.

SYSTEMS & PROFILES 02

Uniquely custom-made windows and doors from By Vincenzo follow a beautifully minimal style with opening systems that allow full span opening and total disappearance of the window, including the frame.

Section

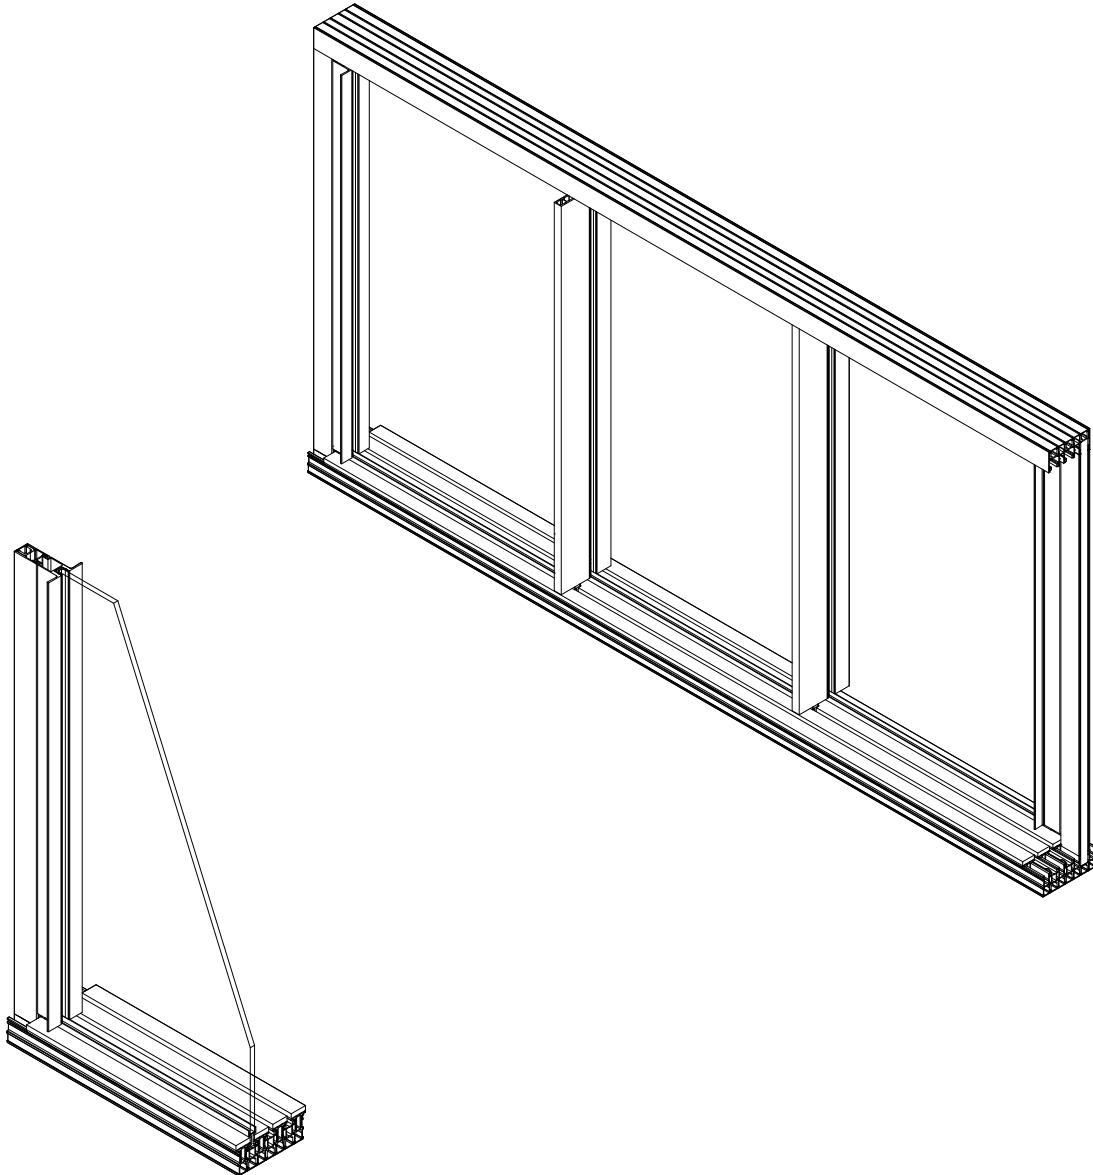

Dimensions & main components

- | | |
|---------|-----------------------------------|
| A 12mm | 1 Infill inserts |
| B 20mm | 2 Subsill tray by Vincenzo |
| C 52mm | 3 Packing to allow water drainage |
| D 121mm | 4 Interlock |
| E 75 mm | 5 Lock system |

Description

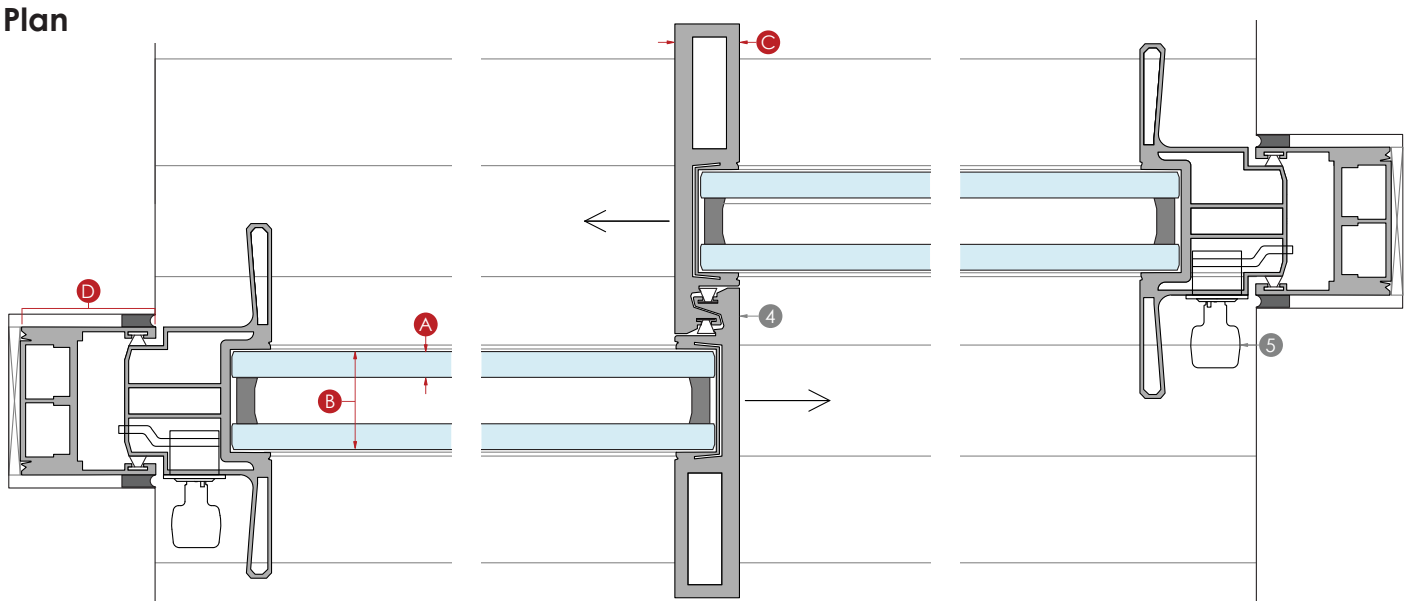

A sleek single glazing system for exterior designs that can accommodate almost any combination of window and door configuration. Choose between standard or underfloor tracks for a minimalist aesthetic for the sliding configuration. Enjoy top-notch acoustic insulation and resilience against infiltration and water penetration. Opt for the integrated motorised system for added convenience. Elevate your architecture with the BYV12 – where form meets function in style.

- 4 Interlock
- 5 Lock system

Description

Elevate your exteriors with double glazing options, a variation of the Superslim 12 – underfloor and invisible tracks. Unmatched aesthetics, top-tier acoustic insulation, thermal performance, and fortification against air infiltration and water penetration. Opt for integrated motorization for added luxury. Architectural excellence at its finest.
